# SUBJECT INDEX

## A

Air Gap, Formation in metallic molds .....	159
Alloys	
Al-21 Si, process variables in refinement .....	232
High Nickel, welding .....	521
354 and 359, premium strength aluminum .....	465
Tin and manganese bronze, shell molded test bars .....	102
Titanium, silicon effect on cast properties .....	285
X310 and X335, free machining .....	315
Zinc, die cast .....	221
Zinc base die casting .....	172
Aluminum	
Casting properties, improving low temperature .....	1
Die Casting .....	323
Pattern equipment .....	613
Test bar molds, metal flow by fluorescent screen radiography .....	296
Aluminum Alloys	
Aluminum-silicon, solidification and structure of eutectic .....	17
Flowing possibilities in permanent molds .....	145
Free machining, X310 and X335 .....	315
Heat treatment of A612 .....	5
High purity, alloying additions .....	2
Low temperature properties improvement .....	1
Process variables in Al-21 Si refinement .....	232
354 and 359, premium strength .....	465
Aluminum Castings	
Alloying additions for high purity .....	2
Alloys 354 and 359, premium strength .....	465
Composition .....	4
Composition and purity effect .....	6
Composition and structure .....	2
Corrosion .....	323
Feeding .....	320
Fluidity .....	319
Gas in .....	322
Gating tilt poured permanent mold .....	216
Grain size .....	4
Hot cracking .....	319
Inclusions .....	322
Low temperature properties improvement .....	1
Melt characteristics .....	322
Quality tests .....	323
Research .....	319
Aluminum-Silicon Alloys	
Chemical constitution .....	24
Eutectic cell formation .....	20
Eutectic, solidification and structure aspects .....	17
Hypereutectic .....	25
Kinetic or growth theory of refinement .....	24
Magnesium phosphide as catalyst .....	235
Measurement of primary silicon particles .....	238
Modified microstructure .....	234
Nickel effect on hot hardness .....	514
Nucleation catalysts .....	237
Phosphorus refinement .....	235
Process variables in refinement .....	232
Solidification changes .....	234
Solidification of eutectic .....	25
Solidification sequence .....	19

Solution treatment influence on microstructure .....	236
Thermal studies and microstructures .....	18
Superheat effect .....	236
Unrefined melt microstructure .....	233
Annealing, Steel castings by short cycles .....	497

## B

Bentonite	
Active content, rework sand .....	37
Level control, rework .....	44
Chemical analysis of various .....	121
Loss calculation, rework .....	44
Scabbing, effect on .....	58
Western and southern .....	129
Western, bonded sand .....	61
Binders	
Bentonite, chemical analysis .....	121
Cereal, effect on core sand .....	641
Clay mineral .....	120
Fireclay .....	120
Loading rate effect on tensile and compressive strengths .....	167
Sand, no-bake, method for testing .....	97
Western and southern bentonite .....	129
Brass and Bronze	
Gating and core binders effect on quality .....	739
Hardness tests, gun metal .....	85
Nickel effect on silicon contaminated gun metal .....	81
Nickel effect on tensile properties .....	86
Pressure tests, gun metal .....	84
Silicon effect on pressure tightness, gun metal .....	82
Silicon effect on tensile properties .....	84
Solidification phenomena application to mold design .....	656
Tensile tests, gun metal .....	85
Test development to replace zinc equivalent parameter .....	753
Tin and manganese bronze, shell molded test bars .....	102
Brinell Hardness	
Tempering temperature vs., ductile iron .....	115
Water quenched and tempered ductile iron .....	111

## C

Carbon Equivalent, Cast iron .....	266
Castings(s)	
Aluminum, improving low temperature properties .....	1
Aluminum, research .....	319
Carbon steel, vacuum degassing and feeding .....	433
Defects, green facing sand effect .....	56
Engineering control for premium quality .....	418
Gating tilt poured permanent mold aluminum .....	216
Gray Iron, nitrogen porosity problem solution .....	528
Mold cavity enlargement in gray iron by green sand mold additives .....	404
and Mold Wall thickness effect, metallic mold thermal aspects .....	159
Multiple, fuel pins for plutonium reactor experiment .....	427
Steel, character and source of cerioxide defect .....	358
Test development to replace zinc equivalent parameter .....	753
Cast Iron	
Additions effect on graphite .....	711

Silica Sand .....		iron .....	116	Welding, Stainless steel and high .....	
Grain distribution .....	168	Tensile Properties .....		nickel alloy castings .....	521
Loading rate effect on binders .....	169	Annealed ductile iron .....	109	Weld Properties, Aluminum .....	
Silicon .....		As-cast ductile iron .....	109	castings .....	4
Contaminated gun metal, nickel .....		Ductile iron .....	292	Widmanstätten, Structure formation .....	
effect .....	81	Loading rate effect of various .....		in gray iron .....	95
Crystals, spatial shape of eutectic, .....		binders .....	167		
aluminum-silicon alloys .....	21	Nickel effect on, gun metal .....	86	<b>Y</b> .....	
in Ductile iron .....	108	Normalized ductile iron .....	110	Yield Strength .....	
in Ductile iron, vs. mechanical .....		Notched and unnotched Charpy .....		Annealed ductile iron .....	109
properties .....	112	impact samples .....	3	As -cast ductile iron .....	109
Gun metal, effect on pressure .....		Oil quenched ductile iron .....	111	Normalized ductile iron .....	110
tightness .....	82	Silicon effect on, gun metal .....	84	Oil quenched ductile iron .....	111
Gun metal, effect on tensile .....		Test Bar .....			
properties .....	84	Aluminum, metal flow by .....		<b>Z</b> .....	
Titanium alloy cast properties, .....		fluorescent screen radiography .....	296	Zinc .....	221
effect on .....	285	Aluminum, CSA, German Dow and .....		Aluminum effect, die casting alloys .....	391
Soil Mechanics, and Hot strength .....	130	French molds .....	300	Aluminum in alloys .....	225
Solidification .....		Aluminum, AFS mold .....	298	Among metals .....	223
Aluminum-silicon eutectic alloys .....	17	Shell molded, tin and manganese .....		Applications .....	223
Aluminum-silicon eutectic alloy .....	25	bronze .....	102	Composition changes and their .....	
Sequence, aluminum-silicon alloys .....	19	Testing .....		effects .....	173
Steel Castings .....		No-bake foundry sand binders .....	97	Copper and other elements effect, .....	
Carbon and low alloy annealing .....	588	Nonstandard, no-bake binders .....	101	die casting alloys .....	392
Carbon, vacuum degassing and .....		Texture, Gray iron ground surfaces .....	248	Die casting .....	172
feeding .....	433	Thermal .....		Die casting alloys, fluidity factors .....	388
Character and source of cerioxide .....		Metallic molds, aspects .....	158	Electrolytic process .....	223
defect .....	358	Studies, aluminum-silicon alloys .....	18	Electrothermic continuous process .....	222
Cobalt effect on maraging .....	29	Tin .....		Extraction to produce .....	222
Controlled atmosphere heat .....		not a Carbide former, cast iron .....	276	Hypereutectic, mechanical .....	
treatment .....	653	in Cast iron .....	275, 281	properties of die cast .....	175
Exothermic padding use .....	684	as Pearlite promoter .....	275	Nickel effect, die casting alloys .....	390
Factors influencing nonmetallics .....		as Pearlite stabilizer .....	278	Progressive changes in die casting .....	
and misruns in .....	193	Tensile strength and hardness .....		analyses .....	173
Impurities buildup during repeated .....		effect, cast iron .....	277	Remelting, turbulence and .....	
melting .....	46	Tin Bronze, Shell molded test bars .....	102	superheat effect, die casting alloys .....	393
Inhibitors for elimination of .....		Titanium, Mechanical properties .....		Zircon Sand, Silica in grains .....	119
ceroxides .....	203	effect, cast maraging steel .....	28		
Macroinclusion studies .....	783
